Hi all,

I just wanted to give you an update on the Clarke R340 submissions on their new containers. I beaned all but one of the applications to CITAB (Kerry, please see the 5 emails I sent to you around 12pm). The remaining application is a 100% repack and technically, it cannot be a 100% repack if it is stored in a different container than the parent product. Please let me know if there is a preferred path forward on this one, otherwise, I'd like to brainstorm with the other IVB PMs on how to proceed. Also, for your awareness, 3 out of the 6 submissions are on team 10 (Mike Walsh's team), including the 100% repack product. Thus, I looped Mike in on why I was working on some of his PRIAs.

I emailed Karen Larson of Clarke to update her on the progress of her applications.

Let me know if you have any questions.

Thanks,
Jackie

Hi all,

I did initially respond to the email from Karen which was left out of the chain (see attached). (I had a mini panic attack thinking I hadn't responded at first).

I just took a quick look and noticed the documents are in documentum and decisions have been created in OPPIN (thank you Kimberly)! To be honest, I do not think anyone on my team has the bandwidth to take on another expedited project, and I do not feel like I can push my team harder at the moment. Therefore, I will be beaning these out and taking care of them myself. I'll try to get them sent out today, or by Monday at the latest. I'll provide an update to the team then, but at that point we will need to coordinate with Kerry and Shyam on the desired/feasible timeline for completion of this first set of reviews (please remember, there are at least a dozen more coming in the next few weeks).

Many thanks,
Jackie

Thanks for the heads up.

Jenn/Jackie, we need to give some feedback on these even if they have not cleared the front end. What can we be prepared to say by Monday?

Best,
Catherine

Thanks, Ed. Yes, let's touch base. I have a team meeting Tuesday morning, and would love to have any feedback on the first round of submissions before then if possible. I can be available anytime Monday except 11 am EST. Otherwise, we can talk Wed morning before we hit submit in PSP for the next batch.

Stay well,
Karen

Good morning, Jackie & Ed

I know that Jackie was out of office on the day of our submission, and yesterday was a Federal holiday – so I’m checking in again to confirm that our submission made it past front end. Will the agency (is it possible to) begin the review of the submission and provide feedback/questions ahead of the completion of a 21-day screen?

Our 2nd submission, for our Merus 3.0 was submitted yesterday (MERUS 3.0: CDX_2021_001618), and we hope to have a batch of a dozen more early next week. All of these products in the early submissions have demand in the small-volume containers (2.5 gal, 10L), for which a steel drum option is not viable. Those that are available only in drums have more commercial flexibility and will be submitted later (in about 3 weeks). To date, we have been very impressed with the performance of the all of the containers tested.

In full transparency, Clarke has initiated a voluntary exchange program for all of its products packaged in fluorinated HDPE, and we aim to replenish material in the field for our users before the season’s start. This week’s snow storm has helped, but only by a wisp. We expect we will need to fill packages and get these ready for distribution in 4 weeks’ time if we are to meet the needs of the mosquito control districts and programs in the south.

If you or the team have any questions about the submission packages, or feedback on what we might do differently to streamline the next submission, I am all in and will be available to a phone call or meeting at any time. The best number is always the Ex. 6 Personal Privacy (PP)

(Ed – the COO of the company providing the packaging Clarke has been evaluating attended the CLA/RISE webinar last week and may reach out to you)

Thank you & Stay warm,
Karen

Good afternoon, Jackie

I am forwarding the submission record and tracking numbers for the first bundled Clarke submission with the new alternative packaging. We will have another submitted early next week, and hope to complete the submissions by end of month.

McLaughlin Gormley King (EPA Co. No. 1021) will be submitting within the next day or two 3 submissions citing (with permission, of course) the study included in this package.

I look forward to your feedback on the submission format. If there is anything Clarke can do differently in the formatting of the submission to streamline the reviews, please let us know. We are anxious to onboard the new packaging that has, so far, met all of our needs and expectations.

Thank you, and stay well
Karen
